

# Coal Mining & Processing's Annual Index for 1983 (Vol. 20)

<b>A</b>	
AMC Coal Convention preview and program, April	42
Acid rain politics stay ahead of science, (NCA Hotwire), August	20
Adam, Bruce Ormsby	
—Diesel debate, The, December	41
—To rip or not to rip, February	22
Adobe mining grows during tough times, May	38
Alice William W.	
—How to design cabs and canopies (Part I), March	61
—How to design cabs and canopies (Part II), April	94
—How to design cabs and canopies (Part III), May	58
Are acid rain controls inevitable? (NCA Hotwire), October	26
Are we running out of resources? No way, (Focus), August	16

<b>B</b>	
Baer, Richard E.	
—How to design and improve stacking and reclaiming systems, January	44
Barnett, James P.	
—Containerized plants regenerate difficult reclamation sites, July	26
Bearing up under mechanical problems, June	45
Britton, Scott G.	
—New boilers mean more business for coal, September	61
Bunin, Jane E.	
—Transplanting offers reclamation solutions, July	24
Buy new, buy used or rebuild? September	70

<b>C</b>	
Campoli, A.A.	
—New technique vacuums gob gas, March	48
Carpentier, Phil T.	
—Conveyor belt scale certification: Weighing the various systems, November	42
Carrier, Jim	
—Preventive maintenance holds key to processing productivity, November	57
Causality and forecasting, (Comment), February	7
Charity begins at home, (Comment), November	9
Clinch River: Another off-budget mistake, (Focus), November	20
Coal cutting research slashes dust, October	38
Containerized plants regenerate difficult reclamation sites, July	26
Continuous miner dust collector proves worth at Eastover, February	46
Conveyor belt scale certification: Weighing the various systems, November	42
Cooper, Harrison R.	
—On-line coal analyzers promise to improve profitability, September	53
Corporate research solves utilization and preparation problems, August	36
Courtney, Wilby G.	
—Single spray reduces dust 90%, June	75
Critical issues remain for coal in 1984, (NCA Hotwire), December	35

<b>D</b>	
Diesel debate, The, December	41
Do you know what your reserves are worth? September	64
Dumbaugh, George D.	
—Getting coal to go with the flow, November	30

<b>E</b>	
Elkhart Mine models progressive approaches, August	24
Employee commitment spurs productivity at small mine, February	50
Erhart, Pamela P.	
—How to reduce back injuries, October	32
Exhibition in print, April	46
Explosives challenge mechanical energy for overburden removal, July	37

<b>F</b>	
Farley, Woodrow	
—How chemically promoted flotation boosts fines recovery, May	48
Fifth annual directory of new technology, March	28

<b>G</b>	
Gaffney, Donald V.	
—Underground coal waste disposal: Can it be cost effective? January	56
Geological information systems: What they offer and which to choose, May	53
Getting coal to go with the flow, November	30

<b>Growth or no growth? That is the question, May</b>	44
Guccione, Eugene	
—Where is the industry going? January	28
—Where is the industry going? (cont'd), October	54

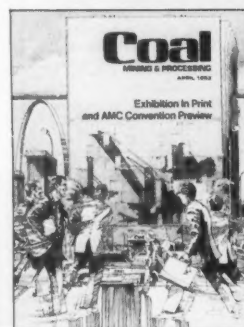

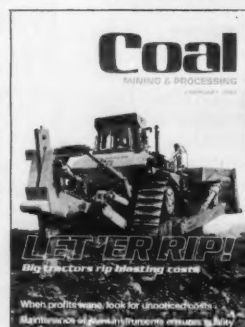

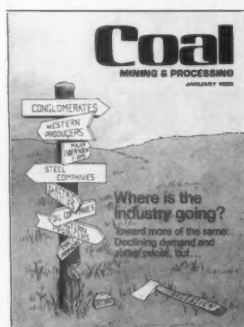

<b>H</b>	
Hanslowan, James J.	
—Logistics in underground mining: A close examination, February	36
Hardfacing and wear plates battle abrasion, June	36
How bottom dumps come out on top, August	30
How chemically promoted flotation boosts fines recovery, May	48
How to design and improve stacking and reclaiming systems, January	44
How to design cabs and canopies (Part I), March	61
How to design cabs and canopies (Part II), April	94
How to design cabs and canopies (Part III), May	58
How to get higher recoveries via improved flotation, June	60
How to keep tire costs down, February	42
How to reduce back injuries, October	32
How to sell more steam coal to Europe, August	48
How to solicit and evaluate mining software, September	77
How will the recession end? (Comment), December	9
Huck, William	
—Instrument maintenance ensures coal quality, February	32
Hundman, G.J.	
—Continuous miner dust collector proves worth at Eastover, February	46

<b>I</b>	
Improving electrical safety in mining, October	46
Indiana's small mines showcase scraper-dozers system, July	30
Information and editorial policy, (Comment), January	7
Innovation and magnitude pace Amex' Delta and Leahy mines, April	30
Instrument maintenance ensures coal quality, February	32
Inventive responses match difficult conditions, June	54

<b>K</b>	
Keep diesels out, (UMWA Speaks), December	37
Kelso, A. Donald	
—How to sell more steam coal to Europe, August	48
Kennedy, Stephen B.	
—Microcomputers streamline preventive maintenance, February	52

<b>L</b>	
Landmark plant builds capacity while maintaining size, May	30
Lawson, J.W.R. II	
—Preparing for 1984 UMW negotiations (Part I), August	40
—Preparing for 1984 UMW negotiations (Part II), October	58
—Preparing for 1984 UMW negotiations (Part III), December	58
Liquid CO <sub>2</sub> coal slurry pipeline: A new concept in conveying, The, September	48
Logistics in underground mining: A close examination, February	36
Longwall census '83, December	49
Low coal operators profit from in-seam mining, December	52
Loy, Michael D.	
—Geological information systems: What they offer and which to choose, May	53
—How to solicit and evaluate mining software, September	77
—Mine cost generators save time and tedium, August	44
—Mining software vendors provide varied packages and expertise, November	60
—Publicly-available software: Inexpensive mining tools, December	54
—Selecting software for surface operations, April	89
—Software that helps you choose the best mining approach, June	69
—Using mine design modules to map your mining approach, July	46

<b>M</b>	
McKeever, Ira E.	
—Liquid CO <sub>2</sub> coal slurry pipeline: A new concept in conveying, The, September	48
Mason, Richard H.	
—Low coal operators profit from in-seam mining, December	52
—Rockdusting technique cuts labor requirements, December	46
—Mechanical vs electric drive: Which to choose? March	53
Microcomputers streamline preventive maintenance, February	52
Miller, Robert F.	
—Hardfacing and wear plates battle abrasion, June	36
Mine cost generators save time and tedium, August	44
Mining software vendors provide varied packages and expertise, November	60
Morley, Lloyd A.	
—Improving electrical safety in mining, October	46

## N

- Need for port development legislation, The, (NCA Hotwire), September . . . 34  
 New boilers mean more business for coal, September . . . 61  
 New politics of acid rain, The, July . . . 50  
 New technique vacuums gob gas, March . . . 48

## O

- Oil analysis reduces downtime and repair costs, June . . . 42  
 Olson, T.J.  
 —How to get higher recoveries via improved flotation, June . . . 60  
 On-line coal analyzers promise to improve profitability, September . . . 53  
 Opening the European market to US steam coal exports, January . . . 39

## P

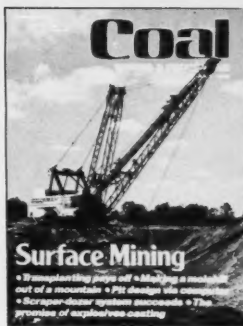

- Past achievements and future challenges—Part I, (NCA Hotwire), January . . . 26  
 Past achievements and future challenges—Part II, (NCA Hotwire), February . . . 17  
 Petrunak, Jim  
 —Explosives challenge mechanical energy for overburden removal, July . . . 37  
 Practical techniques for longwall dust suppression, January . . . 50  
 Preparation/Processing  
 —Conveyor belt scale certification: Weighing the various systems, November . . . 42  
 —Corporate research solves utilization and preparation problems, August . . . 36  
 —Getting coal to go with the flow, November . . . 30  
 —How chemically promoted flotation boosts fines recovery, May . . . 48  
 —How to design and improve stacking and reclaiming systems, January . . . 44  
 —How to get higher recoveries via improved flotation, June . . . 60  
 —Instrument maintenance ensures coal quality, February . . . 32  
 —Landmark plant builds capacity while maintaining size, May . . . 30  
 —Liquid CO<sub>2</sub> coal slurry pipeline: A new concept in conveying, The, September . . . 48  
 —New boilers mean more business for coal, September . . . 61  
 —On-line analyzers promise to improve profitability, September . . . 53  
 —Preventive maintenance holds key to processing productivity, November . . . 57  
 —Randolph Plant passes 60-million-ton milestone, September . . . 42  
 —Winter railcar unloading: Heat thawing vs FCA, November . . . 50  
 Preparing for 1984 UMW negotiations, (Part I), August . . . 40  
 Preparing for 1984 UMW negotiations, (Part II), October . . . 58  
 Preparing for 1984 UMW negotiation (Part III), December . . . 58  
 Pressurized rockdust system pays off for Emery, February . . . 57  
 Preventive maintenance holds key to processing productivity, November . . . 57  
 Publicly-available software: Inexpensive mining tools, December . . . 54

## R

- Randolph Plant passes 60-million-ton milestone, September . . . 42  
 Ray, Dixy Lee  
 —Growth or no growth? That is the question, May . . . 44  
 Reclamation backlog—making a molehill out of a mountain, July . . . 42  
 Repairs critically needed on inland waterways, (NCA Hotwire), May . . . 25  
 Richards, Rod  
 —Buy new, buy used or rebuild? September . . . 70  
 Rise and fall of OPEC and Arab power, The, (Comment), October . . . 9  
 Rockdusting technique cuts labor requirements, December . . . 46  
 Roepke, Wallace W.  
 —Coal cutting research slashes dust, October . . . 38

## S

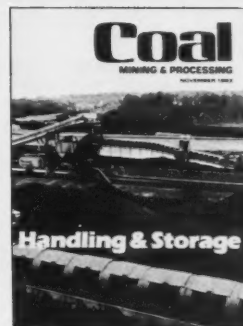

- Saving the federal coal leasing program, (NCA Hotwire), July . . . 21  
 Scott, Frank E.  
 —Adobe Mining grows during tough times, May . . . 38  
 —Corporate research solves utilization and preparation problems, August . . . 36  
 —Inventive responses match difficult conditions, June . . . 54  
 —Practical techniques for longwall dust suppression, January . . . 50  
 —Tanoma: A significant international achievement, February . . . 28  
 Self-promotion: A delicate, but crucial business tool, (Management), February . . . 74  
 Smiley, Carl H.  
 —Glider kits cut truck ownership costs, June . . . 50  
 —How bottom dumps come out on top, August . . . 30  
 —How to keep tire costs down, February . . . 42  
 —Mechanical vs electric drive: Which to choose? March . . . 53  
 Smith, B.J.  
 —Do you know what your reserves are worth? September . . . 64

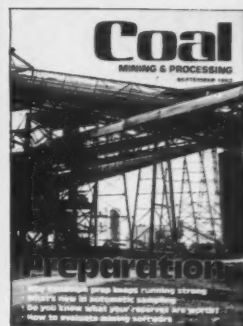

- Smith, Irene J.  
 —AMC Coal Convention preview and program, April . . . 42  
 Software that helps you choose the best mining approach, June . . . 69  
 Solving our transportation puzzle, (NCA Hotwire), March . . . 26  
 Sprouls, Mark W.  
 —Elkhart Mine models progressive approaches, August . . . 24  
 —Innovation and magnitude pace Amax' Delta and Leahy mines, April . . . 30  
 —Longwall census '83, December . . . 49  
 —Randolph plant passes 60-million-ton milestone, September . . . 42  
 Surface Mining  
 —Adobe Mining grows during tough times, May . . . 38  
 —Containerized plants regenerate difficult reclamation sites, July . . . 26  
 —Employee commitment spurs productivity at small mine, February . . . 50  
 —Explosives challenge mechanical energy for overburden removal, July . . . 37  
 —Geological information systems: What they offer and which to choose, May . . . 53  
 —Glider kits cut truck ownership costs, June . . . 50  
 —Hardfacing and wear plates battle abrasion, June . . . 36  
 —How bottom dumps come out on top, August . . . 30  
 —How to keep tire costs down, February . . . 42  
 —How to solicit and evaluate mining software, September . . . 77  
 —Indiana's small mines showcase scraper-dozers system, July . . . 30  
 —Innovation and magnitude pace Amax' Delta and Leahy mines, April . . . 30  
 —Inventive responses match difficult conditions, June . . . 54  
 —Mechanical vs electric drive: Which to choose, March . . . 53  
 —Mine cost generators save time and tedium, August . . . 44  
 —Mining software vendors provide varied packages and expertise, November . . . 6  
 —Oil analysis reduces downtime and repair costs, June . . . 42  
 —Publicly-available software: Inexpensive mining tools, December . . . 54  
 —Reclamation backlog—making a molehill out of a mountain, July . . . 42  
 —Selecting software for surface operations, April . . . 89  
 —Software that helps you choose the best mining approach, June . . . 69  
 —To rip or not to rip, February . . . 22  
 —Transplanting offers reclamation solutions, July . . . 24  
 —Using mine design modules to map your mining approach, July . . . 46

## T

- Tanoma: A significant international achievement, February . . . 28  
 Technology and energy: Why we can't give them up, (Focus), June . . . 25  
 Think now of the long term, (Focus), October . . . 20  
 Tomorrow's success starts with today, (Management), December . . . 17  
 To rip or not to rip, February . . . 22  
 Trail Mountain brings people together for better on-the-job performance, August . . . 33  
 Transplanting offers reclamation solutions, July . . . 24  
 Transportation and the Staggers Act, (NCA Hotwire), November . . . 29  
 Trisko, Eugene M.  
 —New politics of acid rain, The, July . . . 50  
 Trumpy, Thomas B.

- Opening the European market to US steam coal exports, January . . . 39

## U

- Underground coal waste disposal: Can it be cost effective? January . . . 56  
 Underground Mining  
 —Buy new, buy used or rebuild? September . . . 70  
 —Coal cutting research slashes dust, October . . . 38  
 —Continuous miner dust collector proves worth at Eastover, February . . . 46  
 —Diesel debate, The, December . . . 41  
 —Elkhart Mine models progressive approach, August . . . 24  
 —How to design cabs and canopies (Part I), March . . . 61  
 —How to design cabs and canopies (Part II), April . . . 94  
 —How to design cabs and canopies (Part III), May . . . 58  
 —Improving electrical safety in mining, October . . . 46  
 —Logistics in underground mining: A close examination, February . . . 36  
 —Longwall census '83, December . . . 49  
 —Low coal operators profit from in-seam mining, December . . . 52  
 —New technique vacuums gob gas, March . . . 48  
 —Practical techniques for longwall dust suppression, January . . . 50  
 —Pressurized rockdust system pays off for Emery, March . . . 57  
 —Rock dusting technique cuts labor requirements, December . . . 46  
 —Single spray reduces dust 90%, June . . . 75  
 —Tanoma: A significant international achievement, February . . . 28  
 —Trail Mountain brings people together for better on-the-job performance, August . . . 33  
 —Underground coal waste disposal: Can it be cost effective? January . . . 56  
 Using mine design modules to map your mining approach, July . . . 46

## W

- Walsh, Richard J.  
 —Winter railcar unloading: Heat thawing vs FCA, November . . . 50  
 We can't afford R & D neglect, (Comment), July . . . 7  
 Where is the industry going? January . . . 28  
 Where is the industry going? (cont'd), October . . . 54  
 Why are we having a recession? (Part I), (Comment), March . . . 9  
 Why are we having a recession? (Part 2), (Comment), April . . . 7  
 Why are we having a recession? (Part 3), (Comment), May . . . 9  
 Why are we having a recession? (Part 4), (Comment), June . . . 7  
 Why are we having a recession? (Part 5), (Comment), August . . . 7  
 Why are we having a recession? (Part 6), (Comment), September . . . 9  
 Why coal could share nuclear's fate, (Focus), May . . . 21  
 Williams, Gordon  
 —Trail Mountain brings people together for better on-the-job performance, August . . . 33  
 Winter railcar unloading: Heat thawing vs FCA, November . . . 50
